Zahra Aulia Ananta

Junior Software Engineer

zhranantha@gmail.com | +62 800162125
Jambi City, Indonesia

As an Information Technology student at Universitas Aisyiyah Yogyakarta, I have developed skills in coding and software development using programming language such as JavaScript, as well as frameworks like React.js. My strong analytical and problem-solving abilities stem from a solid understanding of algorithms and data structures.

Active participation in campus organizations has enhanced my teamwork and communication skills. I pay close attention to detail and quality in every project. With a passion for continuous learning and adapting to new technologies, I am ready to take on challenges as a professional software engineer.
